

IF NOT FOR YOUR SAKE, THEN FOR HIS.

It's a harsh world out there, and membership in the Center for Nonlinear Science (CNS) at Georgia Tech can help. It has been shown (rigorously) that CNS members are 66% more likely to find a mate and close to 95% more likely to survive a major terrorist attack than non-members. Significant improvements in complexion and physical fitness are also commonly observed among CNS members. So, please, apply for membership in the Center for Nonlinear Science as soon as you can. If you're already here, be sure to stay as long as possible. In this harsh world, you need every advantage you can get, and membership in CNS can help you get started on a long and productive life. Fill out your application form today. It will be the best decision you ever make. Hurry up, because Predrag is counting on you, and you don't want to let him down. Trust me. Do it for him if not for yourself.
