

Hideatsu Yamazaki

Department of Ocean Sciences

Tokyo University of Marine Science and Technology

EDUCATION:

Ph.D. in Ocean Engineering, Texas A&M University (1984)

M. Tech. in Ocean Engineering, Tokai University, Japan (1979)

B.E. in Ocean Civil Engineering, Tokai University, Japan (1977)

EXPERIENCE:

2004-present, Professor, Department of Ocean Sciences, Tokyo University of Marine Science and Technology

1996-2004, Associate Professor, Department of Ocean Sciences, Tokyo University of Fisheries.

1997-present, Guest Investigator, Biology Department, Woods Hole Oceanographic Institution

1993-1996, Associate Professor, Department of Marine Science and Technology, Tokyo University of Fisheries

1991-present, Adjunct Professor, School of Earth and Ocean Sciences, University of Victoria

1986-1991, Assistant Research Scientist, Chesapeake Bay Institute, Johns Hopkins University

1984-1986, Adjunct Research Professor, Oceanography, Naval Postgraduate school.

CURRENT RESEARCH SUPPORT:

Plankton and particle dynamics from Kolmogorov turbulence downwards, Australian Research Council

Phytoplankton microstructure and turbulent flow, Japan Society for Promotion of Science

A Lagrangian study for algal bloom in the ocean mixed layer, Japan Society for Promotion of Science (German-Japan cooperation program)

AWARDS: Tau Beta Pi (1983)

RECENT COLLABORATORS:

D. Kaimykowski, R. Strickler, S. Gallagher, K. Denman, L. Seuront, J. Mitchell, R. Lueck, F. Wolk, C. Rehmann, H. Burchard, H. Li, L. Kantha, H. Nagashima

RECENT STUDENTS ADVISED:

H. Li, T. Nagaï, D. Hasegawa
